

SUMMARY

Senior Frontend Developer with 3 years of experience building scalable, high-performance web applications. Led frontend development for a 400+ page automotive platform at *Intelgency IT Solutions* and currently driving full-cycle feature delivery at *Hexatech Solution*. Experienced in workflow automation using N8N and CRM integrations with GoHighLevel (GHL). Core stack: Next.js, React.js, TypeScript, Node.js, MongoDB, Docker, and Firebase.

EXPERIENCE

Hexatech Solution

Oct 2025 – Present

Senior Frontend Developer (React / Next.js)

Lahore, Pakistan

- Architected and delivered an iframe-embedded web application integrated within a third-party CRM (GoHighLevel), ensuring full isolation, consistent UX, and seamless cross-origin communication.
- Led frontend development across multiple client projects independently, owning the full cycle from architecture decisions to production deployment.
- Built and configured N8N automation workflows to streamline internal data pipelines, reducing manual processing time and improving operational efficiency.
- Developed reusable, scalable React component libraries using Tailwind CSS and PrimeReact, improving development velocity across the team.
- Integrated REST APIs with robust data handling, validation, and error management in close coordination with backend engineers.
- Built internal dashboards and admin panels for managing application data, users, and configurations.
- Enforced frontend best practices by configuring ESLint, Husky, and Git hooks, ensuring clean commits and consistent coding standards across the team.
- Participated in UI/UX discussions, code reviews, and sprint planning to maintain design accuracy and accessibility standards.

Intelgency IT Solutions

Feb 2024 – Jul 2025

Frontend Developer

Islamabad, Pakistan

- Led frontend development for a large-scale automotive platform with 400+ pages using Next.js, delivering responsive layouts and seamless user experiences at scale.
- Built and maintained a full-featured admin panel for content and user management, significantly streamlining editorial and business workflows.
- Integrated both REST and GraphQL APIs in collaboration with backend engineers, improving data flow consistency and application reliability.
- Optimized frontend performance through SSR (Server-Side Rendering) and CDN integration, improving page load times and overall scalability.
- Implemented reusable React components and maintained UI consistency using Tailwind CSS and PrimeReact across the entire product.
- Identified API bottlenecks and contributed to backend improvements, resulting in better response times and system stability.
- Configured ESLint, Husky, and Git hooks for automated checks, enforcing consistent coding standards and high-quality commits.

GeeksHub

March 2023 – Jan 2024

Frontend Developer

Abbottabad, Pakistan

- Developed and maintained web interfaces using React.js and Next.js, implementing responsive UI components based on provided designs.
- Integrated REST APIs to display dynamic data and handled loading, error, and state management scenarios.
- Worked with reusable React components and maintained UI consistency using Tailwind CSS and Material UI.
- Contributed to admin panel features for managing users and application data.
- Participated in code reviews, daily stand-ups, and sprint planning to learn best practices and improve code quality.
