EDUCATION

Iqra University

Bachelor of Science in Software Systems Engineering

FALL 2022 – SPRING 2026

Govt. Girls Comprehensive Higher Secondary School

Intermediate (Pre-Engineering)

2019 – 2021

PROFILE SUMMARY

Motivated Software Systems Engineering student (8th Semester) with a strong CGPA of 3.64. Possesses a solid foundation in programming languages including Java, Python, and C, combined with a passion for Web Development, Cloud Computing, and Artificial Intelligence. Skilled in Object-Oriented Programming, Data Structures, and Software Development Life Cycle (SDLC).

EXPERIENCE

.NET FULLSTACK (.NET + REACTJS) – 10PEARLS

Remote | APRIL 2026 – MAY 2026 (2 Months)

- Developed and integrated machine learning models into a web-based task management tool.
- Gained hands-on experience with ASP.NET Core, React.js, Entity Framework, SQL Server, and Serilog.
- Contributed to building RESTful APIs for task management, user authentication, and role-based access control.
- Implemented frontend features such as dynamic task lists, user dashboards, and real-time updates using React.js.
- Wrote unit tests and performed code quality checks using xUnit and SonarQube.
- Collaborated remotely with senior developers, improving my teamwork and communication skills.

Full Stack Developer with AI – IQRA UNIVERSITY

On-Site | APRIL 2026 – PRESENT

- Developed and integrated AI features such as recommendation systems and predictive models into web applications.
- Gained hands-on experience with machine learning libraries (TensorFlow, Scikit-learn) and frontend frameworks (React.js).
- Contributed to building RESTful APIs for AI-driven functionalities like data prediction, sentiment analysis, and recommendation engines.
- Implemented frontend features such as interactive dashboards, dynamic user experiences, and AI-powered content personalization.
- Worked on deploying machine learning models using cloud platforms and integrated them into web applications.
- Collaborated remotely with AI engineers, enhancing my understanding of AI model deployment and teamwork in a remote setup.

PROJECTS

- **Skintelli (Final Year Project - Phase I)** – Developing a smart application for skin analysis utilizing Artificial Intelligence algorithms for image processing and analysis. Managed version control and team collaboration via GitHub.
- **Azure Disaster Response Platform** – Deployed a disaster response management application using Microsoft Azure Static Web Apps. Implemented CI/CD pipelines via GitHub Actions to automate the deployment process and ensure cloud scalability.
- **Realtime Converter** – Developed a Java-based application for dynamic real-time conversions, applying Object-Oriented Programming (OOP) principles and robust data handling logic. Source code managed via [GitHub](#).

- **Python: Facial Emotion & Gender Recognition** – Developed a real-time Facial Emotion and Gender Detection system using Convolutional Neural Networks (CNNs) and OpenCV. Trained the model in Google Colab with TensorFlow and PyTorch, achieving high accuracy through best-epoch selection and data preprocessing. Integrated a Streamlit-based interface for webcam and image-based predictions, demonstrating model deployment and real-time AI inference capabilities.

CERTIFICATION

WEB DEVELOPMENT, AI & CLOUD BOOTCAMPS

- Cloud Computing from A to Z
- JavaScript & React.JS from A to Z
- Amazon Clone Using HTML, CSS & JavaScript
- Instagram Auth Clone Backend using Node.JS, Express & JS
- OYO Object Detection using OpenCV
- Forage Software Engineering job simulation

RELEVANT COURSEWORK

-
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems
 - **Advanced:** Artificial Intelligence, Computer Vision, Cloud Computing & Virtualization, Software Project Management
 - **Engineering:** Software Quality Engineering, Software Requirement Engineering, Information Security, Web Engineering

SKILLS

-
- | | |
|--|---|
| • Languages: Java, Python, C, C++ | • Tools: Git, GitHub, VS Code, CLI |
| • Web Dev: HTML, CSS, Responsive Design | • Cloud Platforms: Azure Static Web Apps |
| • Databases: MySQL, DBMS (CRUD) | • Core Concepts: OOP, Data Structures |
