SUMMARY

Software Engineer with hands-on experience in AI workflow automation and system integrations. Build scalable automation workflows, designing responsive funnels and landing pages, and implementing A2P messaging solutions. Skilled in advanced API integrations (Webhooks) and experienced with tools such as GoHighLevel (GHL), Zapier, Make, Unbounce, HubSpot, and Zoho.

WORK EXPERIENCE

Systemapic (Progress from trainee to Jr Developer)

May 2025 – October 2025

Jr. Software Developer / Workflow Developer

- Developed and maintained 20+ AI automation workflows in Go High Level (GHL), Zapier, and Make.com to automate tasks and integrate AI (closebot) for autoreplying to customers.
- Design website using wordpress elementor, framer and wix.
- Designed and integrated high-converting **landing pages** and **funnels** using **GHL** and **Unbounce**, aligned with marketing campaigns.
- Conducted API testing with Postman for backend services, validating endpoints and response codes.
- Detected and fixed workflow errors in Make.com, improving automation reliability and reducing client-reported issues by 25%.
- Designed and integrated high-converting **landing pages** and **funnels** using **GHL** and **Unbounce**, aligned with marketing campaigns.
- Created custom **dashboards** in **Zoho CRM** with advanced filters, charts, and KPIs for real-time analytics.

Software Developer Trainee.

March 2025 – June 2025

- Assisted in building and manual testing automation workflows (GHL, Zapier, Make.com) and reported bugs.
- Built multi-platform automation workflows to automate various tasks like sending emails and reminders.

VOLUNTEER EXPERIENCE (Member)

Hammad Foundation: Participated in social services. A vision to make Pakistan a better place.

EDUCATION

Iqra University Main Campus

October 2022- May 2026

Bachelors in Software Engineering (BSSE)

CGPA: 3.61

Sir Syed Government Girls College.

2020-2022

Pre- Engineering

SKILLS & INTERESTS

Skills:

Workflow Automation Tools: AI Workflow Automation, GoHighLevel, Make (Integromat), Zapier, HubSpot, API Integration, AI Chatbot Integration

Programming & Scripting: Python, Java, JavaScript, HTML5, CSS3, Bootstrap, Linux command-line

Databases: SQL (queries, optimization, relational database design)

Version Control & Collaboration: Git, GitHub

Automation & Testing: Selenium WebDriver with Python, Postman (API testing), Test case design & execution

Dashboards & Analytics: Zoho dashboards, KPI filters, real-time tracking & reporting

Web Development & Design: WordPress (Elementor, optimization), Wix, Framer,

CERTIFICATIONS

Certifications: Git Essential Training (LinkedIn Learning)

Appreciation certificate by Tech Connect 23

Web Development BootCamp (GDSC Google Developer Club)
