

Arjun Garasiya

AI Engineer

garasiyaarjun17@gmail.com | Ph: +91-7067789907 | LinkedIn | Github

SUMMARY

Driven AI Engineer with hands-on experience in Machine Learning, NLP, and deploying real-world AI applications. Skilled in building intelligent text-analysis systems using transformer models, Python, Flask/FastAPI, and LangChain. Strong at turning data into practical solutions, optimizing models, and delivering clean, scalable AI products. Passionate about creating smart tools that improve user experience and solve real problems.

INTERNSHIP

Machine Learning Intern

Mar 2025 – Apr 2025

Cognifyz Technologies **ATS-Friendly Smart Resume Analyzer** *Python, NLP, Scikit-learn, Streamlit*

- Built an intelligent resume analysis tool that extracts skills, parses text, and matches candidate profiles with job descriptions.
- Used NLP techniques including SpaCy, Regex, and TF-IDF to identify role-specific keywords and compute compatibility scores.
- Designed a clean Streamlit dashboard to provide instant resume evaluation with actionable suggestions.

PROJECTS

Smart Text AI – NLP Based Text Analysis System

- Developed an AI-powered text analysis system capable of detecting AI-generated text, summarizing long content, correcting grammar, and translating text across languages.
- Implemented transformer-based models such as RoBERTa, BART, and T5 for AI detection, summarization, and grammar correction, significantly improving accuracy and usability.
- Designed a full-stack solution using Flask (backend), React (frontend), and MongoDB (database), enabling seamless user interaction and real-time text processing.

Malware Analysis using Machine Learning

- Implemented a machine learning-based malware detection system achieving improved accuracy over traditional signature-based methods.
- Extracted numerical features from executable files, processed datasets, and trained ML models such as Random Forest and SVM for safe/malware classification.
- Deployed the model using Flask API to analyze files and generate real-time predictions through a web interface.

KEY SKILLS

Programming: Python, Machine Learning, Deep Learning, LangChain, FastAPI, LangGraph

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn

Data Visualization: Power BI, Excel

Soft Skills: Problem Solving, Teamwork, Communication, Critical Thinking

EDUCATION

B.Tech. - Artificial Intelligence & Data Science

2022 – 2026

Prestige Institute of Engineering Management & Research, Indore

12th (MP Board)

2022

B.H.S. School, Manasa **10th (MP Board)**

2020

B.H.S. School, Manasa

CERTIFICATIONS

- Artificial Intelligence (Google Cloud – Simplilearn)
- Power BI Fundamentals
- Business Analytics for Beginners

ACTIVITIES & INTERESTS

- Participated in charity marathon and college tech projects.
- Volunteered in sports events.

HOBBIES

Reading Books, Playing Cricket, Listening to Music
